

CODESOFT POWER FORM

Powerful application builder

CODESOFT Power Form includes all the label design and printing capabilities of TEKLYNX CODESOFT barcode label design software with the added benefit of the TEKLYNX Power Form application builder.

Power Form allows you to rapidly build front-end data entry and label printing applications, to simplify print processes & increase efficiency.

Available as bundled software with maintenance and support included.

- ✓ Standalone or Network VM
- ✓ Add printers or users as needed
- ✓ Subscription or perpetual licensing
- ✓ Compatible with CODESOFT 2025 or later
- ✓ Power Form's user interface is available in 16 languages

CODESOFT POWER FORM CREATOR

Includes CODESOFT Enterprise + Power Form Creator

- ✓ Power Form Creator's easy-to-use drag & drop interface allows rapid creation of printing applications
- ✓ Building a printing application is as easy as designing a label
- ✓ Data entry forms can be customized to fit business requirements & workflows
- ✓ Present only the data required by print operators, using a wide range of configuration options
- ✓ Power Form features include:
 - Label & printer type selection
 - Print preview
 - Page & printer settings
 - Database connections (MYSQL, MSSQL, MS Access, Excel, CSV)
 - Pre-defined values & data control

CODESOFT POWER FORM PRINT ENGINE

Includes CODESOFT Runtime + Power Form Print Engine

- ✓ Power Form Print Engine allows users to view and print predefined forms, using minimal data entry
- ✓ Use Power Form Print Engine to deploy the application in production environments
- ✓ On-demand printing can be initiated using a simple business-oriented user interface
- ✓ No need for print operators to interact with the CODESOFT user interface
- ✓ Print users don't have access to label templates, so can't modify label content accidentally
- ✓ Reduces complexity & simplifies the process for print operators, ensuring accuracy & speed of printing
