PRINT

For mid-level labeling requirements

LABELVIEW is a powerful, yet easy-to-use barcode label design software with helpful wizards and simplified database connections. Streamline data entry with customizable print forms or automate stylistic differences for predefined text to design and print accurate labels quickly. Available in print-only, single-user, and network configurations, LABELVIEW is designed to meet all your mid-level labeling needs.

LABELVIEW includes 4,000+ native printer drivers for maximum printing quality without extra steps.

TEKLYNX offers a variety of flexible licensing options for LABELVIEW, including subscription and perpetual licenses.

Features

Easy to Use

Intuitive interface allows you to quickly become comfortable and efficient using the application.

Industry Compliant

100+ barcode symbologies, helpful design wizards, and customizable printing forms allow you to easily design compliant labels.

Language Support

LABELVIEW supports 25 languages within its interface and has the ability to print virtually any language.

Connectivity

Supports integration with both local and cloud data. Supports local and cloud printers.

Benefits

How can LABELVIEW help solve your business challenges?

- **Reduce Time Spent Designing Labels** - LABELVIEW allows you to create labels quickly using wizards, reducing the overall time spent from label design to print.
- **Reduce Errors** - Form Editor and Form Designer give you the ability to create custom printing forms for accurate data entry. LABELVIEW allows you to perform a quality check by previewing the label prior to printing.
- **Increase Productivity** - LABELVIEW's intuitive interface, coupled with simplified database connections and streamlined data entry, allows you to efficiently design and print labels.
- **Grow Your Business** - LABELVIEW label files can easily be converted to CODESOFT files. As your needs grow, you can easily expand your labeling solution with TEKLYNX.

EDITION COMPARISON

Which edition of LABELVIEW is right for your labeling needs?

LABELVIEW Basic is the entry level version for printing labels without the possibility to connect to a database.

LABELVIEW Pro is recommended for small-scale barcode labeling operations, especially those with manual data input.

LABELVIEW Gold is the high-end edition and includes all features of LABELVIEW Pro, along with advanced design tools.

Note: To run LABELVIEW on a virtual machine, a LABELVIEW VM license is required.

Visit www.teklynx.com/labelview for more information.

LABELVIEW KEY FEATURES	GOLD	PRO	BASIC
Graphic & native barcodes	✓	✓	✓
TCP/IP printing	✓	✓	
Connect to Excel, Access, SQL, etc. via OLE or ODBC connection	✓	✓	
Hidden (unprintable) objects	✓	✓	
Unicode font support	✓	✓	✓
Printer code converter	✓	✓	
Label password protection	✓	✓	
Add a variable offset to a date	✓	✓	
User-defined printing log file	✓		
Connect to Google Drive, OneDrive, and OData (RESTful API)	✓	✓	
Library of VBScript Resources	✓	✓	
Directly modify printer code (Job Modifier)	✓		
Customizable data input screens (Form Designer & Form Viewer)	✓	✓	
Define different styles within one field (Tagged Text Management)	✓		

HOW TO BUY

TEKLYNX sells its label design software through a network of Value-Added Technology Resellers.

1. Download a demo from teklynx.com/labelview, and try out the software for 30 days.
2. A TEKLYNX representative will contact you to discuss your labeling needs and help you select the best label design solution for your company.
3. TEKLYNX puts you in touch with a Value-Added Reseller in your area.
4. Purchase the software through the Reseller.

Is LABELVIEW your solution?

LABELVIEW is ideal for medium complexity labeling environments.

Companies who use LABELVIEW are starting to incorporate variable information into their labels by connecting their design software to an Excel spreadsheet or an Access database, which streamlines the labeling process and increases efficiency. LABELVIEW users still print directly from the label design solution, but might use advanced computing technology such as virtual machines.

Companies who use LABELVIEW typically have:

- 4 - 6 printers
- Multiple users designing and printing labels
- Multiple production lines with different design requirements
- Database-driven templates
- Label designs that incorporate numerous images

TEKLYNX offers solutions for all levels of labeling complexity

LABEL MATRIX

- Simple labeling requirements with fixed data
- Familiar interface
- Helpful label design wizards

LABELVIEW

- Mid-level labeling requirements
- Simple database connections
- Customizable print forms
- Intuitive interface

CODESOFT

- Complex labeling requirements
- RFID support
- Complex database integration
- Regulatory compliance, such as:
 - Unique Device Identification (UDI)
 - Globally Harmonized System of Classification and Labeling of Chemicals (GHS)

Enterprise Label Management Solutions

- Maximum complexity labeling requirements
- CODESOFT + SENTINEL integrates with any ERP system to completely automate label printing
- CODESOFT + LABEL ARCHIVE enables tracking of every aspect of the label design process, robust user permissions, and version control
- TEKLYNX CENTRAL is an all-in-one, centralized, browser-based label management solution for the whole enterprise

About TEKLYNX

TEKLYNX International helps supply chains work better. Today, more than 750,000 companies in over 170 countries trust TEKLYNX integrated barcode and RFID label design products and the people behind its solutions to make barcode labeling operations efficient, accurate, secure and industry compliant. With over 30 years of experience, TEKLYNX is the global leader because of its reliable software and superior customer support. To learn more about how the TEKLYNX community helps companies across industries worldwide, visit teklynx.com or call TEKLYNX in your region. Barcode Better™ with TEKLYNX.
