

# TEKLYNX 2026 BARCODE LABEL SOFTWARE SOLUTIONS

Barcode Better™ with user-centric enhancements & reliable customer support

“TEKLYNX software has proved to be reliable, and the maintenance is easy. For us, the real benefits are the streamlined labeling process at our sites, which saves us a lot of time, and the excellent centralized control over label designs.”

– Bert H., DSM

## LABEL MATRIX 2026

For simple labeling requirements, LABEL MATRIX is a feature-rich barcode label design software for low-complexity labeling environments. Design labels using a familiar Windows interface and wizards to guide you through adding text, images, and barcodes.

### Core enhancements:

- ✓ Alignment with the latest GS1 general specifications
- ✓ In-app notification when a new software version is available
- ✓ Added native label printer drivers

## LABELVIEW 2026

For mid-level labeling requirements, LABELVIEW is an easy-to-use barcode label design software to fit your business needs as they grow. Use the built-in GS1 barcode generator wizard and GS1 Digital Link wizard for GS1 compliance, create smart label templates with variable data, and connect to local databases or cloud data sources.

### Core enhancements, plus expanded capabilities:

- ✓ Support for Data Matrix Rectangular Extension (DMRE) to meet ISO/IEC standards
- ✓ New ready-to-use Amazon Transparency label samples
- ✓ Modernized core platform components with Microsoft® .NET 10

## CODESOFT 2026

For advanced labeling requirements, CODESOFT is a powerful barcode label design software to meet evolving labeling regulations. Print complex barcodes for compliance, establish user rights, encode RFID labels, use built-in sample APIs to automate label printing directly to local workstations, and integrate with enterprise solutions.

### Core enhancements and expanded capabilities, plus more features:

- ✓ New RAIN RFID label samples supporting GS1 EPC (SGTIN-96, SGTIN++) and ISO AFI (BD) encoding
- ✓ Connect to MCP servers, enabling AI models to perform labeling actions
- ✓ Power Form: Application to build front-end data entry and label printing forms

“I cannot tell you how impressed I am with your customer service! Every single time I call, problems are solved the first time and in minutes! I wish everyone had such great tech support.”

– Karen G., Flomatic

Request a free demo of SENTINEL print automation software

[REQUEST DEMO](#)

## SENTINEL 2026

Eliminate the need for manual data entry, reduce errors, and simplify the printing process with label printing automation. TEKLYNX print automation solution, SENTINEL, enables printing out of an ERP system, like SAP, Oracle, or Business Central, and accepts multiple file structures, including XML files formatted by other solution providers.

### Product enhancements:

- ✓ Send print jobs to out-of-network devices
- ✓ Connect to MCP servers, enabling AI models to perform labeling actions
- ✓ Enhanced integration with REST APIs

Request a free demo of LABEL ARCHIVE security & traceability software

[REQUEST DEMO](#)

## LABEL ARCHIVE 2026

Many industries are regulated to enforce labeling workflows and ensure the same process is followed every time a label is generated. LABEL ARCHIVE gives you full traceability of label design, storage, and printing to support compliance with industry regulations and internal process requirements.

### Product enhancements:

- ✓ Prohibit users from reprinting specific templates to prevent duplicate labels
- ✓ Ability to add a 'draft' watermark on all printed draft labels

## TEKLYNX SDK 2026

The TEKLYNX Software Development Kit (SDK) is tailor-made for businesses, software developers, and solution providers to embed high-quality barcode label printing within an ERP system, WMS, LIMS, SCM, MES, CRM, or custom-built application.

### Product enhancements:

- ✓ Connect to MCP servers, enabling AI models to perform labeling actions
- ✓ Enhanced integration with REST APIs
- ✓ Modernized core platform components with Microsoft® .NET 10
