

Color labels you will be proud of at print speeds you can rely on.

Bringing on-demand color labeling in-house is easier, faster, and more affordable than ever with TEKLYNX barcode label design software and VIPColor desktop color label printers.

A flexible and affordable solution from the start.

Easily design color labels with TEKLYNX's barcode design software and leverage the native embedded printer drivers to take full advantage of blazing fast print speeds and extraordinary print quality from VIPColor's VP Series printers for the highest quality on-demand color labels that you can stand behind.

Why are companies turning to in-house labeling?

As businesses are challenged with expanding product lines, navigating minimum order label quantities, streamlining time to market, complying with regulatory measures, and producing the best quality for their brand, they need a solution that provides speed, flexibility, and excellent image quality for printing their labels in-house. Save time and money by printing on-demand, eliminating minimum order label requirements and implementing label design changes on your terms.

Why you should partner with VIPColor Technologies and TEKLYNX for your color label needs:

Flexibility

The VIPColor VIP printer series and TEKLYNX's barcode labeling software join together to empower manufacturers to print high-quality 1600 x 1600 dpi color labels in the quantities they need, make ingredient label changes on the fly, address regulatory changes, and experiment with seasonal or promotional products.

Power

Utilize existing design files and easily integrate them into barcode labels created in LABELVIEW or CODESOFT. Leverage variable data and increase your productivity with the ability to print 1,600 4" x 3" high quality color labels in 10 minutes with the powerful combination of TEKLYNX and VIPColor and the VIPColor VP Series.

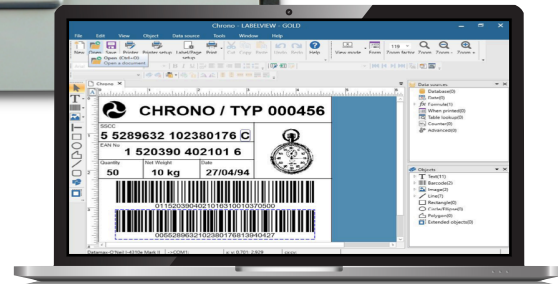

Vibrance

Capture the attention of your customers and improve brand recognition with built-in CMYK and RGB color matching with TEKLYNX and ensure stunning and vibrant color labels thanks to VIPColor's proprietary color formulation.

Better together

Seamlessly use TEKLYNX label design software with VIPColor desktop color label printers to print your compliant labels with the fastest speed, best image quality on-demand and in exact quantities.
