

Design, Print, and Deploy Barcode Labels More Effectively than Ever

Reduce Waste, Cut Labor Costs, Boost Efficiency, Gain Control

There's never been more pressure to maximize efficiency in every part of your operations, and that includes barcode label printing. You simply can't afford lost productivity and extra costs associated with inefficient workflows that waste time and labels. Zebra Technologies, TEKLYNX, and Newcastle Systems have partnered together to create comprehensive barcode labeling solutions that bring maximum efficiency, flexibility, and mobility to label design, management, and printing.

We've combined the TEKLYNX suite of label design, management, and print automation tools with Zebra's industry-leading barcode printers and Newcastle's game-changing mobile workstations to transform barcode printing. You'll gain flexibility, scalability, and efficiency with tools that easily integrate with your existing WMS and ERP systems and put label printing right where you need it.

The Complete Barcode Labeling Solution

- TEKLYNX suite of design, management, and print automation tools
- Zebra industrial printers and ultra-rugged barcode scanners
- Newcastle mobile powered workstations

A single, unified solution to manage label design, approval, printing, and reporting.

- Browser-based printing interface
- Combines label design, traceability, and print automation
- Manage unlimited printers from a single server
- Complete document history and activity logs
- Global scalability
- Mobile label printing app available for iOS and Android

Label printing automation that eliminates manual data entry, reduces errors, and simplifies printing.

- Automate label printing
- Print to unlimited printers across the entire enterprise
- Integrates with ERP, WMS and other business systems, including custom applications
- Initiate printing directly from any business system
- Create labels with CODESOFT

RFID and barcode label software to set your business up for success.

- Advanced barcode label creation and integration
- Intelligent user interface
- Robust database connections
- Over 100 barcode symbologies
- Merge label and document printing
- Compatible with enterprise solutions

Boost Productivity with the Complete Barcode Printing Solution

Get the most out of the TEKLYNX suite of label design, management, and print automation tools with Zebra's industry-leading barcode printers and Newcastle's game-changing mobile powered workstations.

Zebra ZT400 Series Industrial Printers

Zebra's durable, all-metal ZT400 Series industrial label printers are available in three print resolutions and two print widths to support a broad array of critical manufacturing and warehouse applications. The ZT400 Series is powered by Link-OS®, Zebra's one-of-a-kind enterprise printer operating system with advanced connectivity capabilities, extensive device management, and advanced privacy controls to deliver an unmatched level of intelligence and innovation.

Newcastle Systems Mobile Workstations

Newcastle Systems mobile workstations put technology wherever the work is with a simple solution to improve speed, productivity and capacity. A number of flexible designs are available to provide a mobile workspace for barcode labeling and scanning as well as mobile, laptop, or desktop computing. This eliminates the need to move between computers and printers, dramatically improving efficiency and reducing annual labor costs by \$7,500 or more per operator.
