

# HOW TO BE MORE EFFICIENT THROUGH BETTER CONNECTIONS

Use these tips to learn how to become more efficient in your labeling process.

1

## CONNECT YOUR DATABASE TO YOUR LABELING SOFTWARE

With database connections, simply select the relevant database record at print time and watch your label be automatically populated without having to manually key-in data. Not only does this save time, but it also reduces the risk for labeling errors that can cause expensive delays or rejected shipments.

2

## DESIGN LABELS USING INTUITIVE STEP-BY-STEP WIZARDS

When you need to design new labels or generate new barcodes, use helpful wizards to make the process quicker and easier. Built-in wizards walk you through each step of adding text, barcodes, or images, helping you to get it right the first time.

3

## CREATE A CUSTOM LABEL PRINT FORM

Customized label printing forms turn manual data entry from a difficult, time-consuming task to a quick and low-effort way to get accurate print-time data onto your label. Custom label print forms offer a wide variety of field options: text, incrementing numbers, sliders, date pickers, and more.
