3 REASONS TO USE
TEKLYNX PRINTER DRIVERS

A printer driver is a piece of software that bridges the communication between your computer and printer. Below are 3 reasons why you should use TEKLYNX native printer drivers for your label printing.

ACCURACY

WYSIWYG PRINTING

What You See Is What You Get (WYSIWYG) with TEKLYNX native printer drivers. Our drivers are built specifically for your printer model. This ensures the data sent from your computer to your printer doesn't get lost in translation, resulting in accurate labels that match your original label design.

SPEED

FASTER PRINTING

Native printer drivers speak the exact language of your printer model for seamless communication between your computer and printer. Better communication leads to faster data transfer, which results in faster printing.

CUSTOMIZATION

MORE CUSTOMIZATION

Native drivers are optimized for specific printer models so you can use all the features that come with your printer. Rather than a generic print setting screen, set your printing process exactly how you want it with an expanded settings menu.

TEKLYNX has worked closely with the largest printer manufacturers to build over 4,000 printer drivers. Explore TEKLYNX native printer drivers.
