The crisis prevention solution you're not using: LABEL SECURITY & TRACEABILITY SOFTWARE

TEKLYNX

LABEL SECURITY is all about printing the <u>right</u> label,
because when the wrong label is printed, <u>bad things</u> can happen.

FINES	LOST TIME	RECALLS	BAD PRESS	ILLNESS	DEATH

LABEL TRACEABILITY is all about visibility, because
the only way to prevent errors is by knowing how they happen.

RECORDS
DESIGN | PRINT
WHO? WHAT? WHEN? WHERE?
APPROVAL

Maintain a detailed record of a label's life.

CENTRAL REPOSITORY
LABEL TEMPLATES

Create a single source of truth for label template files.

WORKFLOW

Support a lean and efficient process.

Label security and traceability are important to companies in a wide variety of industries:

In the HEALTHCARE industry, companies must comply with the Food and Drug Administration's Code of Federal Regulations (CFR). Title 21 CFR Part 11 requires electronic signatures on label files. Electronic signatures are just one part of label traceability.

In the FOOD industry, strict labeling requirements aim to protect consumers. Especially where allergies are concerned, mislabeled food can trigger a recall. Label traceability allows you to pinpoint the source of errors and quickly find all affected products.

Within the SUPPLY CHAIN industry, traceability is crucial to success. Records of label creation, approval, and printing can be reviewed and analyzed to achieve greater efficiency.

Don't miss out on the label security and traceability solution that could save your company.

LABEL ARCHIVE label security and traceability software:

- Offers user management to prevent unauthorized changes or print jobs.
- Enforces a label approval workflow so incorrect labels don't enter production.
- Enables auditing of label creation and print history so if something does go wrong, you can pinpoint the cause.
