Known Limitations 72
Appendix - LABELVIEW Electronic document licensing 76

System Requirements

This product has been tested on the following Windows® operating systems:

- Windows®11 x64 Version 24H2 (Build 26100.3476)
- Windows® 10 x86/x64 Version 22H2 (Build 19045.5608)
- Windows® Server 2025 Version 24H2 (Build 26100.3476)
- Windows® Server 2022 Version 21H2 (Build 20348.3328)
- Windows® Server 2019 Version 1809 (Build 17763.7009)
- Windows® Server 2016 Version 1607 (Build 14393.7876)

Requires at least one printer driver installed on computer.
Installation requires **Administrator** privileges.

Virtual Environment

This product has been tested on the following Virtual Environment platforms:

- VMWare ESXi 8.0
- VMWare ESXi 6.0 vCenter 6.0 vSphere Client 6.0
- Citrix Hypervisor 8.2.0 Cumulative Update 1
- Microsoft Hyper-V Server 2022
- Oracle VM Virtual Box 7.1.6
- VMware Workstation 17.6.2

Note: To run LABELVIEW on a virtual machine, a VM license must be purchased. Please assess your technical environment requirements and needs surrounding Virtual Machine usage.

LABELVIEW 2025 New Features, Improvements and Fixes

LABELVIEW 2025.00.00

New Features and Improvements	Version
NEW **Electronic document licensing** Refer to LABELVIEW Electronic document licensing appendix for detailed information. The trial version includes access to the native PDF/electronic output feature (eOutput). The eOutput add-on is available for purchase with a production license.	2025.00.00
NEW Support of new regulation GS1 Digital Link in GS1 Wizard	2025.00.00
NEW **Windows Server 2025 Support** - LABELVIEW 2025 can be run on the Windows Server 2025 operating system	2025.00.00
Label object properties - Allow view/read-only access to all label objects and variable properties for use with Runtime edition	2025.00.00
OData database connection - OData performance optimization	2025.00.00
Label templates - New Label Templates (VDA norm (automotive), and others)	2025.00.00
.NET Platform - Introduced .NET 8.0 - for Network License Manager	2025.00.00
IEC 61406 barcode Improvements	2025.00.00
Security improvements ensuring stronger data integrity (Secure Hash Algorithm - SHA-1 replaced with SHA)	2025.00.00
Installer - Default application installation improvements and control (Adobe and Access)	2025.00.00

Defect ID	Fixes	Version
91457	SQL LIKE not correctly accepted in SQL Query Builder	2025.00.00
91373-91915-91246	Non-printable logos from 2021 are printed with 2024.00.00	2025.00.00
91273	Decrementing counter adds leading zeroes	2025.00.00
90874	Picklists cannot be reordered	2025.00.00
90868	Open file issue with the command line (full path of the file was required)	2025.00.00
90853	Picture stretching when rotated	2025.00.00
93368	OnChangeFieldData is not fired when lookuptable value changes	2025.00.00
93137	Unstable VBA script on after print	2025.00.00

Back to Menu

LABELVIEW 2024 New Features, Improvements and Fixes

LABELVIEW 2024.00.00

New Features and Improvements	Version
NEW **Licensing** – Add options to easily renew/manage software license	2024.00.00
NEW **Cloud printing** - Leverage both the Zebra and SATO cloud printing functionality	2024.00.00
NEW **Printing object** - The object printing can optionally be printed based on a condition	2024.00.00
NEW **Print Preview Rotation** – New rotation button on Print Dialog to rotate preview clockwise and counterclockwise	2024.00.00
NEW **OData and oAuth2.0** - Add support to OAuth 2.0 standard for OData database connection	2024.00.00
Network License Manager - Enhance User management: - Using Web License type, administrators will be able to disconnect any user in case of inactivity or other removal requirement - New option to define a user as permanent to maintain user license even if client software session is closed.	2024.00.00
Network License Manager installation – During installation**:** - Ability to define the user for the service - New option to select HTTPs mode	2024.00.00
Network License Manager - Ability to define Secondary license server	2024.00.00
Barcode - Add support for ISO/IEC 61406 regulation for QR CODE and DATAMATRIX barcodes	2024.00.00
GS1 Standard - Updated GS1 barcodes to meet GS1 General Specifications version 24.0	2024.00.00
When printed variables - Ability to show a When Printed variable once and retain data for future label printing	2024.00.00
Settings – "Load printer settings with the label" option can be specified per label or per application	2024.00.00
Settings – New option to print all database records by default	2024.00.00
Settings - New option to easily activate logs and traces	2024.00.00
Settings – New "Label designer font substitutions" dialog where font substitution rules can be managed	2024.00.00
Formula - Formula dialog box enhancements	2024.00.00

Ticket ID/ Defect ID	Fixes	Version
60226	Pasting variable in a paragraph only pastes the variable name	2024.00.00
67004	SQL statement with columns left, right or index does not work	2024.00.00
68832	WYSIWYG issue on PDF printer	2024.00.00
68833	Paragraph length changes after saving/reopening label	2024.00.00
68834	Variable definition in paragraph is lost after copy/paste of part of the text	2024.00.00
70040	Positioning incorrect when copying a text object while using the grid	2024.00.00
70577	Form input improvement	2024.00.00
70869	Improvement to "Copy all as an image"	2024.00.00
71905	Custom Counter does not accept upper and lower case characters in the counting sequence	2024.00.00
72143	Variable images do not update when changing default directory	2024.00.00
74930	Last search value kept when changing datasource	2024.00.00
75995	Font width incorrect when changing the printer	2024.00.00
78385	Improvement when importing Table Lookups via OData with large datasets	2024.00.00
80720	Improvement to Move Last	2024.00.00
82036	Align tools improvement to work with lines	2024.00.00
82623	Printed images are shrunk or stretched when Markem printers are used	2024.00.00

Back to Menu

LABELVIEW 2022 New Features, Improvements and Fixes

LABELVIEW 2022.00.03

New Features and Improvements	Version
Use in RDP – RDP Client installer is now available on the DVD	2022.00.03

Defect ID	Fixes	Version
74227	VBScript to change size of label does not work	2022.00.03
77035	'Helvetica Bolt' font is wider in design and printout compare to 2019 version	2022.00.03
77480	Carl Valentin DPM III xi107/12: Text Width incorrect	2022.00.03

LABELVIEW 2022.00.01

New Features and Improvements	Version
NEW **Automatic extension for offline licenses** – If the PC is connected, the extension of license is automatic (like for online licenses).	2022.00.01

LABELVIEW 2022.00.00

New Features and Improvements	Version
NEW **Windows 11 Support** - can be run on the Windows 11 and Windows 2022 Server operating systems	2022.00.00

Defect ID	Fixes	Version
67771	It should be possible to install NLM even if the setup fails to create a firewall exception	2022.00.00
63239	Some JPG were not displayed 2021 version	2022.00.00
61616	Formula issue: 0 ^ 2 result was 1 instead of 0	2022.00.00
64221-60231	Shared file for a variable with counter becomes locked in case cancel printing (next print job fails) or after printing with communication error	2022.00.00
56076-59969	vbscript - Docobject.visible, Variable.DisplayInForm properties were not updated	2022.00.00

59336	VBScript: Line Shape object is drawn incorrectly on the label design area when VBScript is executed	2022.00.00
60565	Form is not updated when variable is changed by VBscript	2022.00.00
52716	Page setup changes after switching printer	2022.00.00
60086	Some otf characters are not displayed correctly	2022.00.00

Back to Menu

LABELVIEW 2021 New Features, Improvements and Fixes

LABELVIEW 2021.00.02

New Features and Improvements	Version
NEW **Licensing** - Printer based licensing added	2021.00.02

LABELVIEW 2021.00.01

New Features and Improvements	Version
Operating System - Updated Operating System controls	2021.00.01

LABELVIEW 2021.00.00

New Features and Improvements	Version
NEW **Labels and Databases on the Cloud –** • Ability to open and save labels on Google Drive or OneDrive • Ability to connect label fields to databases from the Cloud (Google sheets, Microsoft Excel Online, OData Feed)	2021.00.00
NEW **Touch2Print** – New LABELVIEW tool designed to help you print labels from a Windows OS touch screen device	2021.00.00
Printer dialog box – • Ability to hide/show Windows printers • Ability to see original printer name after renaming • Printer search improvement includes family name in search pattern	2021.00.00
Variables – Ability to easily duplicate variables (excludes Database variables)	2021.00.00
Images from a database field - Add ability to read Images from database using BLOB (Binary Large Object) data types	2021.00.00
Shared variables – • New events at the application level have been added to provide the ability to create a VBScript to load / save shared value from a database • An option has been added to encrypt shared variables files	2021.00.00

Visual Basic Scripts – • VBScript library - now possible to define VBScripts at the application level enabling the use of a script in multiple labels • Variables with a VBScript are better identified in Data Sources view with a VBScript icon	2021.00.00
Form Editor – Wizard available to easily create and add variables onto a customized Form	2021.00.00
Form Designer/Form Viewer Add-ons – These Add-ons are now included as standard in LABELVIEW Pro product range	2021.00.00
Network License Manager - Updated with an option to manage communication between LABELVIEW and the Network License Manager using TCP/IP, in addition to file share	2021.00.00
Table Lookup – Ability to switch between a database query and a Table lookup	2021.00.00
Designer improvements – • New objects snapline option to snap an object to another object(s) or label by any edge • New Aligned distributed option for text alignment	2021.00.00
GS1 Wizard - Add GS1 Composite functionality to the GS1 Wizard	2021.00.00
Printer Code - Ability to see the printer code without printing to file	2021.00.00
SQL Query Builder – Integration of a new powerful SQL Query Builder	2021.00.00
Object specific options – Object specific options are kept on printer port changing	2021.00.00
Image Library – Implemented new image library	2021.00.00
GS1 Standard - Updated to latest application identifiers (GS1 General Specifications v.21.0.1)	2021.00.00
No longer supported - Discontinued support for Windows Server 2008 R2 and Windows 7	2021.00.00

Defect ID	Fixes	Version
42318-54666	The 'Open as read-only' option was missing in Open label dialog	2021.00.00
48407	Some PCX images were not displayed correctly	2021.00.00
52878	Incorrect data record was printed using ASCII table when data file contained empty lines	2021.00.00
54594	Database grid was not updated on print form	2021.00.00
53292-40879-54318	High CPU/processor resource usage with Click Print	2021.00.00
54594	Database grid was not updated on print form	2021.00.00
54637	Crash with some text fonts	2021.00.00
54944-49153	ROP issues related to certain printer settings	2021.00.00
56740-55637	Encoding error in Data Matrix code	2021.00.00
58023	"Too many sessions" message when printing from multiple Excel sheets	2021.00.00

50605	Image object: some supported formats (*cgm, *dxf, *plt, *svg, *tiff) don't display in the wizard	2021.00.00

Back to Menu

LABELVIEW 2019 New Features, Improvements and Fixes

LABELVIEW 2019.02.00

New Features and Improvements	Version
NEW **Formula** - New formula for VDA 6bits encoding	2019.02.00
Dealer DEMO license – Information related to the use of Dealer DEMO license is better displayed **Note**: The use of a Dealer DEMO license for internal or external label printing for production or sale is strictly prohibited and is a violation of the license agreement	2019.02.00
WYSIWYG – Redesign improvement with overlapping objects, with black/White reversed text and with bold italic Windows font	2019.02.00
High resolution images WYSIWYG – Display improvement with high-resolution images	2019.02.00
PDF images display – Improvement of PDF images display	2019.02.00

Ticket ID/ Defect ID	Fixes	Version
48873	With TSC printers, text with different printer font size was outside the box	2019.02.00
46152-43664-45465	Transparency issue in paragraph when line spacing is reduced	2019.02.00
36456	Cyrillic letters were not displayed correctly with some Printer fonts for "Tec B-SX4" THT Printer	2019.02.00
37723	Using some Windows printers, text with italic option was displayed slightly cut and out of frame	2019.02.00
38871	Black-and-white .wmf Image with background, checked 'Negative' option was displayed incorrectly using a thermal printer	2019.02.00
40125	Polygon shape applied to text object was not displayed using a thermal printer	2019.02.00
49363	Designer interface was not displayed when launched through a Remote Desktop Web Access site	2019.02.00
49562	SQL Query Builder error using SQL Anywhere provider and using variables in the query	2019.02.00

49248	Opening old labels with rectangles having specific positions did not display the rectangles	2019.02.00
49495	Display issue on some system when using the hardware acceleration. An option has been added in cs.ini to switch off the hardware acceleration	2019.02.00
47658	Can't copy and paste into an existing field, a new field was created instead	2019.02.00
49335-49275	Performance viewer gave wrong information in some specific cases with formulas	2019.02.00
51030	If the connected database was updated while the query result dialog was opened, the wrong record may be printed	2019.02.00
51850	With excel database connection, no warning was displayed if column headers contained space, prefix or suffix and database was not connected	2019.02.00

LABELVIEW 2019.01.00

New Features and Improvements	Version
GS1 Standard - Updated to latest application identifiers (GS1 General Specifications Release 19.1)	2019.01.00
Binaries signature - Binaries are now signed for better security and compatibility	2019.01.00
Printer drivers - New protection system for Markoprint printers	2019.01.00

Ticket ID/ Defect ID	Fixes	Version
48562-48556-48563-48590	Form variables order was not correct when opening lab files made with older versions	2019.01.00
48574	Issue with multiple selection with mouse on print/more panel	2019.01.00
48584-48465	Fonts are no longer continuously scalable	2019.01.00
44858-44857	LABELVIEW 2018 Variables Date was not refreshed with VBScript	2019.01.00
47507-47485	Display problem when using inverse text	2019.01.00
47805-47851	Counter option 'Reset after data source change value' was unable to be selected for Advanced variable	2019.01.00
47904-47890	Colored rectangle was not displayed correctly	2019.01.00
48440-48439	SQL query was not accepted if an INNER JOIN was used	2019.01.00
48465-48464	Object Width + and - icons was not working with Text field objects	2019.01.00
48860- TKX-155532-G0R2	When a database header has a "/" it was not visible in the Simple Print Database form	2019.01.00

49190-49187	The preview crashes using Chinese language	2019.01.00

LABELVIEW 2019.00.01

New Features and Improvements	Version
NEW Updated the default Trial software mode to LABELVIEW Pro	2019.00.01

LABELVIEW 2019.00.00

New Features and Improvements	Version
NEW **Feedback** - Added the ability for users to send product feedback through the product, Help > Send feedback	2019.00.00
NEW **Form Editor** - Ability to customize the 'When printed' form and variables, leveraging several data entry controls such as calendar, radio buttons, checkboxes, images, and more	2019.00.00
NEW **GDPR** - Alignment with the General Data Protection Regulation (GDPR) privacy policy requirements	2019.00.00
NEW **Object options** - Added object group/ungroup capabilities (right-click)	2019.00.00
NEW **Printer search** - Ability to search both, list of all native printer models and previously added printers	2019.00.00
NEW **Barcode fit-to-frame** - Ability to set barcode width parameters	2019.00.00
Dialog windows - Updated the following GUI dialog windows: Print, About, Objects Order, Shared data sources Management, Printing Log File, Tagged Text Management, Form Customization, RichTextField Input	2019.00.00
GS1 Wizard - Improved the user interface and AI (application identifier) data entry, including the ability to update an existing GS1 barcode using the wizard	2019.00.00
GS1 Standard - Updated to latest GS1 standard and application identifiers	2019.00.00
Image properties - Updated image mode default to 'Zoom'	2019.00.00
Objects order - Enhanced Object order selection and organization functionality	2019.00.00
Object options - Added object alignment functionality (right-click)	2019.00.00
Password - Updated application level password with confirmation field	2019.00.00
Print - Added infinite print to enable an array of print scenarios when used in conjunction with Portwatch and the print form	2019.00.00
Print dialog - Added 'Last used' print dialog start tab selection	2019.00.00

Print dialog - Ability to set printing interface default: General, Form, Database, or Last used	2019.00.00
Picklist search - Ability to search using multiple-character strings	2019.00.00
Printer grouping - Copies of added printer models are now grouped together alphabetically	2019.00.00
UPC-A barcode - Display human readable Check Digit as default	2019.00.00
Security - Added TLS 1.2 encryption for secure internet communications	2019.00.00
No longer supported - Discontinued support for Windows Server 2003 and Windows XP in 2019 moving forward	2019.00.00

Ticket ID/ Defect ID	Fixes	Version
47352-47356	Data Matrix - label display is different than final print	2019.00.00
46476-46523	Application should select native printer driver instead of Windows driver equivalent when same printer name exists (same as in v2015)	2019.00.00
TKX-140491-K4L2-43333	Scroll bar does not allows navigation to entire label when screen is not maximized in some circumstances	2019.00.00
TKX-147377-B8J4-46663	SQL Query Builder issue when using Microsoft Text Driver ODBC driver	2019.00.00
44920-44942	Unable to change Image color using bottom Color toolbar	2019.00.00
44898-44899	Alignment change by script not effective on screen	2019.00.00
44615-44645	Human readable mask not applied when using free positioning	2019.00.00

Back to Menu

LABELVIEW 2018 New Features, Improvements and Fixes

LABELVIEW 2018.01.01s

New Features and Improvements	Version
NEW **USB Protection** - Compatibility with SD dongles	2018.01.01s (aka 2018.02)

LABELVIEW 2018.01.01

Ticket ID/ Defect ID	Fixes	Version
43937-43938	XLSX database connection issues	2018.01.01

LABELVIEW 2018.01.00

Ticket ID/ Defect ID	Fixes	Version
42920-42921	View mode name (x) is not respected when drag and drop of variable in paragraph in edit mode	2018.01.00
42936-42937	Drag and drop of variable on a paragraph should end edit of previous paragraph	2018.01.00
42925-42926	Heterogeneous paragraph, texts are not aligned to baseline in v2018	2018.01.00
42102-42103	Wrong PDF format when inserted in LABELVIEW v2018	2018.01.00
40903-41005	WYSIWYG issues on existing label designs	2018.01.00
42041-42043	Stretch Mode None display image too big	2018.01.00
40220-40221	Single Excel database access with different layouts	2018.01.00
41692-41693	Error when trying to create Table Lookup variables one-by-one	2018.01.00
39125-39128	Text field disappears after switching View Mode	2018.01.00
39100-39107	WYSIWYG issue with TTF fonts	2018.01.00
40222-40223	Error when selecting database search, from label form input display	2018.01.00
39528-39592	Barcode with Free Human has wrong values displayed on label design	2018.01.00
40999-41000	Text field edit mode not exit automatically when printing	2018.01.00

39109-39112	WYSIWYG issue when using Windows graphical emulation	2018.01.00
39103-39110	Search in database not triggered by entry key	2018.01.00

LABELVIEW 2018.00.00

New Features and Improvements	Version
NEW **Image options** - Created an option to launch directly the default image editor through the image by right clicking on the image, and selecting 'Edit' from the image's context menu. Image can be saved to overwrite the existing label image	2018.00.00
NEW **License** - Quickly confirm available product deactivations for a license in the Help>About screen, or through License Manager for a network license	2018.00.00
NEW **Database access** - Ability to load data from Access/Excel without requiring a full install of Microsoft Office. The Microsoft Access Database Engine 2010 Redistributable package is included, providing connectivity to MS Access and MS Excel using Office 2000\2003\2007 formats (.mdb, accdb, .xls, .xlsx)	2018.00.00
NEW **Formula** - An ASCII table is now available to easily select a value and add to a formula	2018.00.00
User interface - The overall user interface is updated with a cleaner design, including updated colors, icons, and toolbars. The navigation icons are configurable to change the size (small or large), or add/remove large icon text	2018.00.00
Formula - Created commonly used barcode specific formulas to easily add associated characters and functions	2018.00.00
Formula preview - The formula properties now has a dynamic preview (including errors) for the selected formula	2018.00.00
Objects - When moving objects on a label, the original location of the image remains viewable to assist with design	2018.00.00
Objects selection - Easily find associated label elements by selecting the desired label element, data source, or object, and all corresponding elements are visually identified	2018.00.00
Shared variables - Shared variables are now easily identifiable by the visible shared icon	2018.00.00
Status bar - The bottom status bar is clickable, providing easy access to associated dialogue boxes (i.e. Printer settings, Help>About, Properties for selected label element)	2018.00.00
Documents panel improvements - • A modified mark (*) in each document tab header is added if the document was changed. It's convenient to the contextual menu is extended with more option like accessing the document properties • A close button (X) on each document tab • Ability to float (label) documents for label-to-label comparison	2018.00.00

Extended object - The process to create extended object is now similar to other objects. After selecting the extended object type, click on label to create the object at this position. Previously, the object was automatically added to the upper-left corner of the label document	2018.00.00
Help menu - The Help menu now contains links to online resources: Administrator's guide, User guide, Tutorial, and Customer Support	2018.00.00
Toolbars - Toolbars are configurable to select docking position (Top/Left/Right/Bottom). NOTE: Toolbars no longer float	2018.00.00
Toolbar options - From the toolbar, the 'Variable name' (Data sources) and 'Object name' dropdown lists display each item with an icon representing its type for easy identification	2018.00.00
Settings - Moving forward, settings will be retained on upgrade. To preserve settings, a generic path will be used - C:\ProgramData\Teklynx\LABELVIEW	2018.00.00
Label/Page setup dialog - Quickly open the 'Label/Page setup' dialog by double click on free label area	2018.00.00
Objects view - Added a context menu for Objects in Objects view, similar to the existing Variable from Data sources View	2018.00.00
Printer settings - The current printer settings are now retained when making changes to printer ports	2018.00.00
Variable properties - The Variable length default value remains 100, however, it can be extended up 65,000 (max int) NOTE: For drivers, the max value remains 32767 to avoid risk and impact on some drivers that use this max value	2018.00.00
The Log file dialog is extended - • Ability to generate a 'Daily based filename' • Ability to select extension of log file	2018.00.00
Document properties dialog Icon updates - • Icons for General, Summary, Statistics and Review available in all products • Icon for Visual Basic Scripting is available for LABELVIEW Pro • Icon for Extended available is available for LABELVIEW Runtime • All Icons are available in LABELVIEW Gold	2018.00.00
Visual Basic Scripting - The icon for VB Scripting tab (properties dialog) is updated if script exists for an object, variable or document. The icon helps identify objects with active VB Scripting	2018.00.00
Object properties - Prevent multiple objects editing through Properties dialog to avoid unintended changes that may break a portion of the selected objects. To avoid this, context menu for multiple selected objects and variable is updated. The "Properties" menu now displays sub-items with names of the selected objects or data sources	2018.00.00

Control variables - Created control variables for watermark text adjusting: @WATERMARKTOPPOS - top watermark text position on the label @WATERMARKLEFTPOS - left watermark text position on the label @WATERMARKFONTSIZE - watermark font size (16 points by default) @WATERMARKFONTNAME - watermark font name to use (Arial by default) @WATERMARKROTATE – watermark rotation (0 by default)	2018.00.00
GS1 barcode properties - Added a GS1 Stackable Checkbox to enable stackable GS1 codes GS1 wizard is updated to the current GS1 specification v18: • Add new items: 8112,416,7020, 7021, 7022, 7023, 22, 714,8013 • Adjust AIs size: For AI 91-99 maximum length should be changed from 30 to 90 • Adjust AIs description: • For 8006 from "Identification of the Components of a Trade Item" to "Identification of an individual trade item piece" • For 20 from "Variant Number" to "Internal product variant" • Renamed AI: 240 Additional product identification assigned by the manufacturer Old name: Additional Item Identification • Adjust associations: • Update association for AI 8019 with 8017 or 8018 • Update association for AI 17 with 01 or 02 or 255 • Update association for AI 394, 8111 with 255 • Update association for AI 7020,7021,7022 with 01 • Update association for AI 8012 with 01 • Update association for AI 714 with 01	2018.00.00
HIBC Wizard - HIBC Wizard is updated in accordance to current HIBC regulation	2018.00.00
Printer port - A new dialog to create local ports is now available, providing the same functionality as the system dialog. This dialog can be reached in 2 ways: • Open "Printer" dialog, click on "Add" button and then click on "Create new port" • Open "Change printer port" dialog If you run the application without administrative rights, the button "Create new port" will be disabled in all dialogs Only adding additional printer ports using LABELVIEW is allowed. To remove ports, navigate to the system dialog in system settings. You can remove only manually added TCP IP ports. A port cannot be created with unsupported symbols (for example: with the symbol '/'), or with the port name that already exists	2018.00.00

Oracle database - For Oracle database connections, the logic of enumerating tables, views, synonyms, etc., is fully redesigned. Oracle specific SQL queries for system tables are now used. The execution of the specific SQL queries is significantly more efficient than using other provider methods. The SQL Query builder is unchanged (3rd party module)	2018.00.00
Objects - Multiple item selection and management improved, can now: • Drag and Drop all many Samples labels in designer • Perform document switching with very complex labels • Significantly increased performance for multiple Table lookups • Text selection with many linked variables • 'Select All' objects with label that includes many objects (>300)	2018.00.00
License Manager - Product license activation window is now included at the end of the installation process	2018.00.00
Formula - Added the ability to suppress blank rows in a paragraph using the SuppressBlankRows formula within a variable	2018.00.00
Text properties - The font window now shows the most recently used fonts, the current font, and each font is displayed in its corresponding style	2018.00.00
Text properties - Font list is now navigable through multiple character keyboard entry to quickly find the desired font	2018.00.00
Barcode properties - Ability to search for a barcode within the Barcode Wizard	2018.00.00
Barcode properties - Added X-dimension (mils) measurement to barcode properties	2018.00.00
Templates - Added a static File menu option for easy access to the Template folder directory	2018.00.00
Licensing - A Virtual Machine (VM) License is no longer required for the Microsoft Surface Pro	2018.00.00
No longer supported - OLE Object and OCX field are no longer used in v2018. Prior labels with such objects, the object is converted to an image	2018.00.00

Ticket ID/ Defect ID	Fixes	Version
24928- TKX-88803-T3F6	Disabling "Print when enter key is pressed" not working for Direct Printing	2018.00.00
27193- TKX-97908-M3S8	Key Upgrade tool is started when old dongle is connected	2018.00.00
27202- TKX-97370-X5Z5	Network version only sends emails if the License Service Controller is open	2018.00.00
27204- TKX-90337-L6K5	Table Lookup wizard not working with CSV connections	2018.00.00

27208- TKX-92510-N1F0	Database Manager - Database view crashes on print screen	2018.00.00
31651- TKX-101150-B9Z1	Labels are not printed in the requested order when printing from the search option	2018.00.00
31795- TKX-101514-X1J2	Incorrect GHS Symbol naming	2018.00.00
27199- TKX-95639-H9N4	DB connection and free variable displaying issue when both are named equally	2018.00.00

LABELVIEW 2015 New Features, Improvements and Fixes

LABELVIEW 2015.01.00s

New Features and Improvements	Version
NEW USB Protection - Compatibility with SD dongles	2015.01.00s aka 2015.02

LABELVIEW 2015.01.00

Ticket ID/ Defect ID	Fixes	Version
24994	Database query with parameter crashes when the value of the parameter is changed	2015.01.00
24917	Label that contains complex formulas hierarchy can takes long time to load and evaluate	2015.01.00
24945	Specific formula DLL crash during call to custom function	2015.01.00
24981-TKX-90393-R3N5	Shared counter not incrementing on first page	2015.01.00

LABELVIEW 2015.00.00

New Features and Improvements	Version
NEW **New Barcodes** - Grid Matrix and DotCode are now available	2015.00.00

GS1 – New AIs: The following Application Identifiers are now available is GS1 wizard: AI 243/AI 255/AI 427/AI 710-712/AI 8017/AI 8019/AI 8200	2015.00.00
File open dialog - The File open dialog is now based on Windows 8 style	2015.00.00
Pick List enhancement - It is now possible to change pick list values dynamically based on another variable (file, database...)	2015.00.00
RTF enhancement - It is now possible to insert variable(s) in a RTF field Note: Variable name should not contain the \ character	2015.00.00
Tagged Text Management - It is now possible to define font name and color attributes for foreground and background	2015.00.00

Ticket ID/ Defect ID	Fixes	Version
24307-TKX-83120-P2P9	Number of printed labels are incorrect in direct mode with a 2 layered label	2015.00.00
22964-TKX-71556-L8N5	Some TT font are missing in TextArt field	2015.00.00
24366-TKX-83385-X3L7	Error when using table names with spaces in SQL query	2015.00.00
22687-TKX-67907-M0W5	Default margin settings checkbox is missing	2015.00.00
21462-TKX-58309-R4B4	Label is printed around 30% smaller as on screen with Avery DPM6 or 64-04	2015.00.00
21463-TKX-58310-N8F1	Label objects start flickering in content view mode when using database	2015.00.00
21065-TKX-54956-L8X0	Font width changes after edit properties validation	2015.00.00
22687-TKX-67907-M0W5	Default margin settings checkbox is missing	2015.00.00
22899-TKX-70749-T0S2	TextArt outline property crashes with Windows7/8	2015.00.00
22900-TKX-70750-W4H9	MS SQL Server Type bigint does not work	2015.00.00
21789-TKX-64186-T1N9	Upper / lower case problem in When Printed variable	2015.00.00

Back to Menu

LABELVIEW 2014 New Features, Improvements and Fixes

LABELVIEW 2014.00.00s

New Features and Improvements	Version
NEW **USB Protection** - Compatibility with SD dongles	2014.00.00s

LABELVIEW 2014.00.00

New Features and Improvements	Version
NEW **New formulas** - New formulas are available to calculate check digit for Voice code (CRC-16) and PZN	2014.00.00
NEW **LABELMATRIX converter** - A new converter allows converting labels coming from the LABEL MATRIX designer	2014.00.00
GS1 – QRCode - The GS1 wizard now supports QRCode	2014.00.00
VB Scripts - VB Scripts can be defined at multiple levels (Document, Objects and Data sources) and triggered for different events	2014.00.00
Tagged Texts management - This feature allows you to format parts of text based on tags (such as bold, italic, underline). This can be used, for example, to highlight allergens in compliance with new food labelling standards (European regulation 1169/2011)	2014.00.00
System Event Viewer - License events are logged in the System event viewer. This allows tracking of important information about the License (i.e. License is about to expire, License is expired, License not found...)	2014.00.00
Label import from vector image - The label import capability based on vector format (ie DXF, WMF,....), allows the fixed part of the label to be created in a click (text, image, lines, etc....) only the data source part remains to be created. This is useful when the design of template labels is initially created in a CAD software	2014.00.00
Print dialog - It is now possible to keep the Print dialog box open after the print job to create subsequent print jobs without having to reopen it	2014.00.00
Form Designer and Network License - Form Designer is now supported with Network Licenses	2014.00.00
Database Manager Improvements - Column widths are now persisted to avoid resizing. Added support for default field values when adding a record	2014.00.00
Evaluation mode removed - When no valid license is found the application can no longer be executed	2014.00.00

Network Tolerance - In case of network disconnection, it is possible to define a tolerance period (max. 480 minutes). By default, there is no tolerance (0 minute). If the network is disconnected, the labeling software stops working. Note: The tolerance begins after about 6 minutes of connection to the server and the user token will be locked during the tolerance period	2014.00.00

Ticket ID/ Defect ID	Fixes	Version
21292-TKX-56685-X0V6	ClickPrint adds lots of temp files during each launch	2014.00.00
21015-TKX-54462-G1P5	BestBefore formula always display result in English	2014.00.00
20908-TKX-52827-M9Z6	FiletoData function doesn't manage Unicode text files	2014.00.00
20543-TKX-48168-B1Q1	Click Print doesn't display labels with background images correctly	2014.00.00
20209-TKX-43832-W4Y4	Connection issue with the pervasive OLE DB Driver	2014.00.00

Back to Menu

LABELVIEW 2012 New Features, Improvements and Fixes

LABELVIEW 2012.01.00

Ticket ID/ Defect ID	Fixes	Version
20421-TKX-46668-K6D8	Impossible to select a native printer driver with Database Manager on some computers	2012.01.00
20320- TKX-37377-V7L8	Driver for Avery 64-05 printer prints labels one by one when using page format '2 labels in a row'	2012.01.00
20229-TKX-43832-W4Y4	Application does not work with the pervasive OLE DB Driver	2012.01.00
18765- TKX-27669-W0F6	Combo box in Form Designer does not allow user to select fields from a database	2012.01.00
19327- TKX-35645-M6Q7	Application crashes at print time with huge print log file	2012.01.00
20059- TKX-42049-F9C5	Form customization cannot be set to higher then 510	2012.01.00
20165- TKX-43493-N8X2	New label wizard changes values entered for label size	2012.01.00
19411- TKX-36286-T1R1	Reset counter on variable change malfunction	2012.01.00
19911- TKX-39776-N6Q9	Shared variables management improvement	2012.01.00

LABELVIEW 2012.00.00

New Features and Improvements	Version
NEW **Windows 8 Support** - LABELVIEW 2012 can be run on the Windows 8 operating system	2012.00.00
Image transparency - It is possible to define for image object a color that will be used to define transparency	2012.00.00
Uniscribe management - This resolves issue with specific language manipulation (Japanese, Chinese, Arabic,...) and when there is mixture of Right to Left (Arabic) and Left to Right text	2012.00.00
Evaluation mode - In Evaluation mode, printing is not possible anymore	2012.00.00

Ticket ID/ Defect ID	Fixes	Version
17616 - TKX-22864-S6M1	Table ALIAS not accepted with where clause	2012.00.00
18043 - TKX-20389-V0Q8	Fields keep old value when query does not return record	2012.00.00
18023- TKX-17061-V0N0	Linked counters update issue with 2 labels per row	2012.00.00
18041 - TKX-20052-Q4P7	HIBC Wizard omits $$ when using date format YYJJJ and separate bar codes	2012.00.00
18550-TKX-25914-R4G3	Focus was not on quantity field and new printing box	2012.00.00
18567-TKX-24684-S5C7	Bar width of 2/5 interleave barcode not printed correctly in case of some ratio	2012.00.00
18031-TKX-25387-R9R4	Codabar checksum not calculated correctly	2012.00.00

Back to Menu

LABELVIEW 10 New Features, Improvements and Fixes

LABELVIEW 10.00.00

New Features and Improvements	Version
NEW **Clip mode for Image** - This new option allows an image to be clipped to the shape	10.00.00
NEW **New Barcodes** - Micro QRCode, ISBT128 Wizard, Kix Code, Japanese post, Australian post, Telepen, and Code 1	10.00.00
When Printed - Printing has been made easier when using When Printed variables	10.00.00

Ticket ID/ Defect ID	Fixes	Version
15505	The software does not prompt to save .csq files unless a change to the query has been made	10.00.00
15504	I cannot use the same date characters in the Best Before function as I can in the Date Stamp function	10.00.00
15684	Click Print does not function the same as it did in LABELVIEW 8	10.00.00
15221	There is an error when creating a DBF database	10.00.00
15503	The Arial Unicode bold font is not converting properly	10.00.00
15850	The connection to my SQL database is failing when I create it in Form Designer	10.00.00

Back to Menu

LABELVIEW 9 New Features, Improvements and Fixes

LABELVIEW 9.00.00

New Features and Improvements	Version
NEW **New Wizards:** Wizards are available to assist with creating new labels and adding barcodes, images, text, and variables	9.00.00
NEW **Form Designer:** The Form Designer allows you to create a custom printing interface, which simplifies printing for print users and reduces user error by eliminating the need to search for labels. The Form Designer replaces Label Select by offering a graphical approach to selecting the label and label data	9.00.00
Updated Printing Interface: The Quick Print interface has been updated to include a live preview. As you select database records or enter When Printed text, the preview will update to display the data that will print on the label. The print interface has also been updated to provide quick access to the When Printed inputs that are needed every time you print, but retain the ability to change printer settings and quantity in the same window	9.00.00
Additional Activation Options: Protection method updates have provided additional activation options. You can now activate LABELVIEW from a separate workstation using a USB drive, along with online activation, online by proxy, phone, and e-mail activation. The activation wizard automatically selects online activation if you are connected to the Internet	9.00.00
Layers Feature: The Layers feature has replaced run separators, offering more flexibility and an easy-to-use interface. Layers give you the option to add a unique header and footer to each batch of labels	9.00.00
Data Sources Categories: Data sources can now be organized in sub-categories at a display level (Data Sources view)	9.00.00

Ticket ID/ Defect ID	Fixes	Version
50633-19502 46715-18862	Formula Bestbefore does not work with Julian day (jj)	9.00.00

Back to Menu

LABELVIEW 8 New Features, Improvements and Fixes

LABELVIEW 8.50.03

Ticket ID/ Defect ID	Fixes	Version
18410	DSN not found error appears when opening older version labels	8.50.03
18700	Modulo 24() needs 13 symbols	8.50.03
18699	Problems occur when using the When Printed field	8.50.03
18697	My human readable font displays incorrectly when using a custom font with UPC-A	8.50.03
18804	The application freezes when resizing fields that use a .OTF font	8.50.03
18664	Aztec barcode only generates up to the first bar character	8.50.03
18442	When using Code 39 Mod 43 with custom font, it strips the last character and check digit on the human readable text	8.50.03
18964	The number 1 is added to the barcode when printing	8.50.03
18373	Counter adding with linked variable to a Code128 does not print in version 8.20.04	8.50.03
18663	The 96XI III (V) driver is not available	8.50.03
16777	The barcode is always left justified with When Printed data	8.50.03

LABELVIEW 8.50.01

Ticket ID/ Defect ID	Fixes	Version
18645	When I print using the new version of the software, the database shows blank	8.50.01
18650	When using an ODBC connection, only the fields used on the label show in the database	8.50.01
18648	When connecting to an Excel spreadsheet with OLEDB, only fields on the label display at print	8.50.01
18646	Software cannot display database	8.50.01

LABELVIEW 8.50.00

New Features and Improvements	Version

NEW **Windows 7 Support:** LABELVIEW 8.50.00 can be run on the Windows 7 operating system	8.50.00
Updated GHS Icons: Additional GHS icons are available in LABELVIEW 8.50.03	8.50.00

Ticket ID/ Defect ID	Fixes	Version
13545	Justification does not work with a Comwatch field	8.50.00
14928	UCC/EAN 128 Multi shifts to the right when printing	8.50.00
16381	Job Modifier data is truncated for Sato (X) drivers	8.50.00
16413	Command file Maxicode barcodes from database do not update	8.50.00
17026	PDF417 does not increment with Printer as the increment method	8.50.00
17405	When using a Commwatch field, the other When Printed fields shift to the left	8.50.00
17708	Error 1855 occurs when trying to save a modified label that has a password	8.50.00
18011	RF tag positioning display units change from millimeters (mm) to inches (in)	8.50.00

LABELVIEW 8.20.04

Ticket ID/ Defect ID	Fixes	Version
17530	Cannot use Cyrillic and Polish characters in one label	8.20.04
17094	Black box not printed properly	8.20.04
17321	Select True Type fonts do not display after upgrading from previous version of LABELVIEW	8.20.04
16830	Incorrect Error Correction level in PDF417 barcode	8.20.04
17121	WMF picture display error after upgrade from Version 7	8.20.04
17122	When using Command files, the error log is not created upon failure	8.20.04
16933	Unable to print .bmp and .png graphics under specific circumstances	8.20.04
17379	Issues when creating a GS1 Data Matrix barcode	8.20.04
16964	Cutter will not cut after a batch or print job, only after individual labels	8.20.04
17644	Error 1855 occurs when trying to save a modified label that has a password	8.20.04

17955	Database connection incompatibility between LABELVIEW 6 and LABELVIEW 8 on all DBMS (Data Base Management Systems), including AS400, Oracle, and SQL. NOTE: If you transfer labels to LABELVIEW 8 from older versions using server databases like Oracle, MS SQL, or DB2, note the following: The first schema (in alphanumeric order) that contains the selected Table in the Object Properties will be used. This means that if you have two different schemas that contain the same Table, you must edit the label in LABELVIEW 8, reopen the Database Object Properties, and check its settings for the data source.	8.20.04

LABELVIEW 8.20.03

Ticket ID/ Defect ID	Fixes	Version
15188	LABELVIEW crashes when selecting multiple text objects and changing the text properties	8.20.03
15295	When using CommWatch as a key field, the printer only prints out the record	8.20.03
15297	Click Print does not open a label with the correct printer	8.20.03
15310	Command File printing results in dropped label fields	8.20.03
15824	When Printed fields are cleared when using the scrolling option	8.20.03
16027, 16389	When Printed fields are cleared after the label is closed	8.20.03
16032	Modified When Printed fields do not print the new information	8.20.03
16062	gtdbdebg.dll crash error occurs when opening label with ODBC connection and ODBC error logging turned on	8.20.03
16164	GDI objects increase with each print job sent, leading to printed blank labels	8.20.03
16225	DB field value is incorrect on the first printed label when multiple records are selected	8.20.03
16317	When printing an EAN multi with a counter, the leading zero is missing	8.20.03
16403	When a label has an invalid value assigned to a data field, print errors occur and stop the printing process. An option has been added to suppress the error messages	8.20.03
16480	Multiple records are incorrectly shown after Unselect All	8.20.03
16737	Incorrect data is sent to the printer for the UPC-E barcode	8.20.03
16739	UCC/EAN 128 barcode displays incorrectly using any data source except Fixed	8.20.03
16764	Error when barcode and graphic are both positioned on a label for AutoLabel printers	8.20.03
16789	Information drops from label after 3,000 prints	8.20.03
16851	After 20 print jobs are sent, the database information on the label is missing	8.20.03

17024	TrueType fonts are changed to printer fonts when changing print in same Zebra family (X)	8.20.03

LABELVIEW 8.20.01

Ticket ID/ Defect ID	Fixes	Version
13753	Serial file with EAN 128 barcodes have excessive white space on the right side	8.20.01
14501	Error opening file names containing periods	8.20.01
15040	EAN 13 barcode does not display correctly with TEC B-SA4	8.20.01
15180	FNC1 incorrectly placed after data for AI (410)	8.20.01
15910	OLEAutomation:LabelDocument.PrintLabel() no longer selects the correct record for paragraphs	8.20.01
16028	Incorrect records are printed from .dbf files when a quantity is entered	8.20.01

LABELVIEW 8.20.00

Ticket ID/ Defect ID	Fixes	Version
13150	Using the UCC/EAN 128 Multi with AI of 21 does not increment correctly	8.20.00
14276	DataWatch prints blank fields	8.20.00

LABELVIEW 8.10.06

New Features and Improvements	Version
NEW **Works with Windows Server 2008:** LABELVIEW has received "Works with Windows Server 2008" certification for 32- and 64-bit systems	8.10.06

Ticket ID/ Defect ID	Fixes	Version
BLUI-6NQQDS	Fixed issue occurring when a barcode is linked to an OLE DB text field with 256 or more characters for the field length	8.10.06
15994	Fixed issue occurring when linking a text field to a 2D barcode, which would result in an "Error 1058: Invalid item in expression" message	8.10.06

17586	When Printed fields will no longer clear after printing if the Clear After Print setting is set to NO	8.10.06
17753	Label inventory units of measurement now work correctly when using a network path	8.10.06

Back to Menu

New Device Support

The following devices and their associated drivers have been added in this version:

New devices in version 2025.00.00

Manufacturer	Model	
AMETIS	AMX4 200	AMX4 300

Known Limitations

- OLE DB Driver 19.0 for SQL Server: New security changes in v19 might cause issues with connections or the inability to save a connection. Clients can revert to v18 or change their configuration. See the Microsoft article for more information here https://techcommunity.microsoft.com/t5/sql-server-blog/ole-db-driver-19-0-for-sql-server-released/ba-p/3170362.
- For network license users, it is recommended to use the same version for Network Licence Manager (NLM) and Label Designer client.
- For Hasp protection type, Sentinel Hasp driver version 8.41 or higher are not compatible with LABELVIEW, version 8.31 must be used.
- Network port collusion:
  The Network License Manager uses the network port 55174 by default. If this port is already used by other software, it causes one of the following abnormal behaviors:
  - Network License Manager installation fails with the following error message: Error 1920. Service TkxWebLicenseServer failed to start.
    or
  - Network License Manager installation is successful. The License Server Controller indicates that The service is running, but the service status indicator is orange and the content of the License Server Controller is gray. Clients cannot connect to the License Service if using the web method.

  Workaround:
  - Ensure that the default port 55174 is not used during the installation of the Network License Manager.
  - Install the Network License Manager
  - Start the License Service Controller and press the Settings button
  - Change the Port number setting to a different value which is not used by any software and press OK.
  - Adjust the firewall settings to ensure that the newly selected port is accessible by other computers (exact method depends on Windows version, and type of ativirus software installed)
  - Use the License Service Controller to Stop and Start the License Service
  - Now it is possible to enable the use of port 55174 by another software
- If you have a LABELVIEW 10 version installed and activated, please ensure that you deactivate the license during the uninstallation of LABELVIEW 10. The deactivation of the LABELVIEW 10 licenses is not automatically deactivated upon uninstall/install.
- Execution of software not allowed under Guest account.
- The Windows system clock must be set to the correct date and time and should not be modified. If the system clock is incorrect then Subscription licenses and licenses requiring an internet connection might not function correctly. For example, a Software license might display a “Connection required” error even though an internet connection is available. To resolve this, you should correct the system clock and reactivate the license. (A quick workaround is to disable the “Check for server certificate revocation” option under Windows Internet Options.)
- Start menu shortcuts aren't immediately accessible in Windows Server 2016
  This is a system issue, that is solved after reboot.(see Microsoft support article)

- When application is used in RemoteApp it is displayed behind the main window.
  This is a system issue (see Microsoft support article). The solution is to update to Windows 10 version 1807 with latest update (including KB4284848).
- After installation application might be slow to launch the first time, this is normal and the result of .NET optimization.
- Under Server 2008 R2, installation of Internet Explorer version 9 or higher is required to use help.
- After this product is installed, it is not recommended to install a previous version. The installation of two different versions of the same product can lead to instability and incorrect behavior.
- Updates KB4055994, KB4055237, KB4054022 and KB4078408 can lead to registry corruption and non-stable application work.
  In such case reinstalling or repairing the product will fix the registry.
- Application and Device Control component of Symantec Endpoint Protection (version 12 or older) antivirus should be uninstalled (not just disabled) before product installation because this component could prevent installation.
- Counter used in Variable Pick List is not incremented while printing if target 'When Printed' variable is not placed on the label.
- Value from Database is not updated during printing if dynamic variable (When Printed, Counter) is used in WHERE clause (SQL Query)
- Database and Table lookup variables with query in SQL mode, do not support Stored Procedure with parameters based on document variables, only fixed parameters are supported.
- The Image transparency feature apply for input image that does not already have a transparency color defined.
- In order to connect to Access or Excel files in version 2007 or later on a system where Microsoft Office 64-bit is installed you will need to install Microsoft's AccessDatabaseEngine 32-bit.
  http://www.microsoft.com/en-us/download/details.aspx?id=13255
- Software Key Protection does not support Proxy with authentication. A license that requires internet connection (Online/Platinum) will not be compatible in such case.
  In case of Software Key Protection, IP Security Policy Management (IPsec) settings can create slow response time from Activation server if it is blocked.
- To use this product via RDP (remote application / remote desktop), a network license is required on environments such as Remote Desktop Services (formerly Terminal Services), Citrix,..
- Under Windows 8 and Windows Server 2012, if the dongle HASP is not recognized, install the driver manually from the DVD using the following command:
  "<Drive>:\Software\Misc\Hasp_v6.51\Haspdinst.exe -i" (where <Drive> is to be replaced by the letter of the DVD drive).
- When upgrading LABELVIEW, we recommend uninstalling any previous versions before installing the new version.
- Shared counters are not incremented in preview mode, only at print time.
- RTF Field has a limitation when used with Fit to Frame option where the size and/or complexity of the RTF text in the input may cause the displayed text to be truncated.

- Text objects with composite data sources or different styles (font size or attributes) should be edited using the text properties dialogue only. If you use the text wizard, the text object becomes fixed with a uniform style.
- When importing an image from a network, a path like //MachineName/Path/Filename cannot be entered directly into the "Image Selection" dialog box. The workaround is to map the network drive, or to drag and drop from the explorer.
- While using the animation option in the wizards, performance may be slightly reduced.
  Turn off this option for faster performance if needed.
- With a hardware key license, when running LABELVIEW while system is not fully initialized, LABELVIEW may run in EVALUATION mode.
  Make sure the system is fully loaded before running LABELVIEW.
- Please note that you may need Administrator's rights to perform some actions, such as adding a printer with non-direct access or creating a system DSN data source. Please verify that you have sufficient rights before performing these actions.
- Query definition only supports Tables within the default schema. If it is necessary to use a table from another schema, the SQL mode should be used, using a syntax like: SELECT * FROM Schema.Table.
- The Database Manager is a generic database tool that relies on OLE DB Provider (ODBC is not supported). OLE DB Provider or the DBMS itself can both have some limitations. For example, with an Access database, when you set 3 unique fields in Database Manager, only the first one will be set. The recommendation is to use the internal DBMS tools to modify database structure, especially when working on advanced actions (like multiple constraints and primary key modification). The same is true for big tables where the response time can be slow on some operations.
- A database connection must be linked to the DatabaseGrid control displayed in sample form "DBForm.xmf" in order to show information (i.e.; identity.mdb).
- The ODBC driver has some limitation when used with files (xls, csv, txt...). It is recommended to use the OLE DB driver.
- ODBC drivers are recommended for PostgreSQL. With OLEDB drivers, fields may not be enumerated.
- Visual FoxPro OLEDB Provider v 9.0 is not supported.
- Layers are not managed in the Print Preview. All Layers are displayed at the same time.
- When using Layers (Footer/Header...) the quantities defines from control variable (i.e. @SERIALQTY) should not change during multiple records printing as it is not updated after first printed record. Labels with Layers are not optimized for performances.
- It is recommended to use the native Oracle OLEDB driver to access Oracle database instead of Microsoft OLEDB provider that have limitations
- The LABELVIEW installation may upgrade your system with 3rd-party components and files that are not yet Windows Server 2008 compliant because they may lack versioning information (like company name or version number) and/or they may lack a digital signature (please see the readme file for file names and locations).
- This product is not certified with any extended hardware device (such as Multiport serial cards and expansion ports). Tests and validation have to be performed with each piece of hardware in case of usage.

- Pocket printing supported data sources are: Fixed, When Printed, Database, Date/Time, and Counters. Only fixed graphics are supported. Data source maximum length is limited to 49 characters. For more information, see the help file.
- The SQL Query Builder does not support parameterized queries that have an object (table, view, etc.) defined with the same name as the database (for example, database_name=Product and table_name=Product).
- The SQL Query Builder does not support “System Objects” like system tables, views...
- Visual Basic Script Manager: user library module is a place where you can define your own global variables, methods, or classes. Note that you should not invoke other functions outside the definitions in your library. If you do then they will be executed every time the application interacts with the VBS Engine. This can lead to unexpected behavior."
- LABELVIEW Converter and LABELMATRIX Converter are not certified for BASIC range. It is recommended to use them with Pro and Gold range.
- Open/Save labels on Google Drive: Open/Save in Drive dialog box doesn't open the last used folder if its name contains special characters. In this case, the last used folder is the root folder. This is a limitation with Google Drive.
- The label version is guaranteed when using ascending version. When using a different a version, please check that all versions are in the same range:

Backward Compatibility Range	CD Masters	Serialization Version
9.00.00	LV900_XX_R1	1000
10.00.00-10.04.00	LV1000_XX_R1 - LV1002_XX_R2 LV1004_XX_R5	1001

Appendix - LABELVIEW Electronic document licensing

TEKLYNX 2025 products version introduce new licensing model for PDF and Electronic document.

The license defines a quota for the Electronic Outputs license restricted activities. The unit of the licensing is the number of labels generated by the operation.
The quota applies for an interval of any consecutive 7-days.

For LABELVIEW the quota 5000 Electronic Outputs license units.

The following operations are subject of Electronic Outputs licensing:

- Printing via Windows drivers producing common document formats (PDF, XPS, image formats, etc.);
- Printing with any printer to ports capturing the printout electronically (FILE:, prompt for file, or fixed file ports);
- Exporting the document to PDF or image formats directly.

For some operations the **eOutput counting** will be effective and some will also require the **Output addons.**

Following table describes the different use cases and licensing requirements.

Review by feature / scenarios for LABELVIEW

	Feature details	Licensing
eOutput driver	Printing to a driver that has been identified as such. An **eOutput driver** is a driver that Teklynx products will identify as systematically producing electronic outputs. Examples: Microsoft Print to Pdf, Bullzip, PDF creator, printers that generate PDF, XPS, Postscript, PCL, image (PNG, JPG..), SVG,EMF, Text, XM, etc	**eOutput** counting => **YES** **eOutput Addon** required => **NO**

	Feature details	Licensing
Preview and Images	Through **User Interface** Menus: File > Export to an image file Edit > Copy to clipboard	**eOutput** counting => **NO** **eOutput Addon** required => **NO**

	Feature details	Licensing
Printer Command File	Through **User Interface** Printer command file can be generated though different methods: At print time using the “Printer code” button option (TEKLYNX Driver only). Using a file port (eg: C:\temp\print1.txt) for both TEKLYNX and Windows drivers	**eOutput** counting => **NO** **eOutput Addon** required => **NO**

	Feature details	Licensing
Internal PDF printer	**Internal PDF printer** - allows generate PDF without the need of third-party driver. - provide custom settings like possibility to name the PDF file as you want (important to associate the PDF file to the user request)	**eOutput** counting => **YES** **eOutput Addon** required => **YES**

The Trial version includes access to the native PDF/electronic output feature (**eOutput**).

The **eOutput** add-on is available for purchase with a production license.
