

**TEKLYNX®**

# Training

Basic | Intermediate | Developer

## Training available

### By product:

TEKLYNX®  
**CODESOFT**

TEKLYNX®  
**LABELVIEW™**

## Level 1 | Basic

---

### Goal

This course provides training on the basic features of CODESOFT or LABELVIEW. You will learn to use the software's basic commands, to configure a printer, create and print labels.

### Programme

- > Overview of CODESOFT or LABELVIEW
- > User environment
- > User Interface
- > Printer settings
- > Page setup
- > Inserting Fixed objects in a label
  - Text
  - Barcodes
  - Images
  - OLE
  - Presentation of RFTag – only for CODESOFT
  - Drawing tools
- > Advanced objects
  - Advanced settings
  - Log file
- > Command File Interpreter (CFI) – only for CODESOFT
  - Click Print

Prerequisite	Duration
Knowledge of Microsoft Windows OS	1 day

### Training method

- > Presentations and practical work

## Three different programmes

- > Level 1 | Basic
- > Level 2 | Intermediate
- > Level 3 | Developer

### Level 2 | Intermediate

---

#### Goal

Learn to use the advanced features of your barcode labelling software. By the end of the session you will be able to create variables, connect databases to your labels, build complex queries and install a network version of the software.

#### Programme

- > Presentation
- > Variable objects
  - Dates
  - When Printed
  - Counters
  - Advanced
  - Formulas
- > Connecting to a database
  - ODBC
  - OLEDB
  - SQL Query Builder
  - Table lookup function
- > Installing a network version

Prerequisite	Duration
Level 1 (Basic) training, or equivalent	1 day

#### Training method

- > Presentations and practical work

### Goal

Learn to use the advanced features of your barcode labelling software. By the end of the session you will be able to create an interface to drive CODESOFT with ActiveX.

### Programme

- > Customized programme, based on your requirements:
  - Form Viewer
  - Form Designer
  - ActiveX

Prerequisite	Duration
Level 2 (Intermediate) training, or equivalent	1 day

### Training method

- > Presentations and practical work

### Goal

Learn to use the advanced features of your barcode labelling software. By the end of the session you will be able to create an interface to drive LABELVIEW with Form Designer and Form Viewer.

### Programme

- > Form Viewer
- > Form Designer

Prerequisite	Duration
Level 2 (Intermediate) training, or equivalent	1 day

### Training method

- > Presentations and practical work
